

Autonomous AI Product Manager - Project Report

1. Requirements Summary

Requirements summary not available.

2. Sprint Plan

Sprint 1 (Mock) (5 pts)

- As a user, I want AI features to work

Sprint 1 (Mock) (5 pts)

- As a user, I want AI features to work

Sprint 1: Foundation & Core Customer Experience (37 pts)

- Customer Registration with Email/Password
- Customer Login/Logout
- Display Menu Categories
- Display Menu Item Details
- Add Items to Cart
- Update Item Quantities in Cart
- Remove Items from Cart
- Implement Password Encryption
- Enforce HTTPS
- Mobile Responsive Design for Customer Interface

Sprint 2: Ordering, Payments & Basic Tracking (50 pts)

- Place Online Pickup Order
- Credit/Debit Card Payments
- UPI Payments
- Display Estimated Preparation Time
- Customer Order Status Tracking
- Display Order Statuses (Received, Preparing, Ready, Completed)
- Secure Payment Processing Implementation
- Order Placement Email Confirmation
- Order Status Update Email Notifications
- Payment Confirmation Notifications

Sprint 3: Staff Operations & Loyalty Program (52 pts)

- Staff View New Orders
- Staff Update Order Status
- Earn Loyalty Reward Points
- View Reward Point Balance
- Redeem Loyalty Points at Checkout

Autonomous AI Product Manager - Project Report

- Password Reset Functionality
- Prevent Order Cancellation After Preparation
- Search Menu Items
- Filter Menu Items by Category
- View Payment History and Receipts

Sprint 4: Admin Dashboard & Core Analytics (64 pts)

- Admin Dashboard Login
- View Daily Sales Reports
- View Weekly Sales Reports
- View Monthly Sales Reports
- View Top-Selling Products Report
- Manage Menu Items (CRUD)
- Edit Menu Prices
- Manage Customer Accounts
- Implement Role-Based Access Control (RBAC)
- Restrict Staff Access to Financial Reports
- Social Login with Google

Sprint 5: Advanced Analytics, Non-Functional Refinements & Polish (73 pts)

- Customer Purchase Trends Report
- Revenue Forecasting Dashboard
- Platform Scalability for Multiple Store Locations
- Horizontal Scaling Support
- Achieve 99.9% Uptime
- Implement Daily Data Backups
- WCAG Accessibility Compliance
- Achieve Sub-2-Second Page Load Time
- Achieve Sub-1-Second Search Results
- Support 10,000 Daily Users

Autonomous AI Product Manager - Project Report

3. User Stories (Points & Jira Links)

As a user, I want AI features to work [HIGH]

Needs Python 3.12 for AI features.

Story Points: 5

As a user, I want AI features to work [HIGH]

Needs Python 3.12 for AI features.

Story Points: 5

Customer Registration with Email/Password [CRITICAL]

As a customer, I can register an account using my email and password so I can access personalized features and place orders.

Story Points: 5

Customer Login/Logout [CRITICAL]

As a customer, I can log in and log out of my account securely so I can manage my session.

Story Points: 3

Display Menu Categories [HIGH]

As a customer, I can view menu items organized by categories like Coffee, Tea, Snacks, and Desserts so I can easily browse.

Story Points: 3

Display Menu Item Details [HIGH]

As a customer, I can see the name, description, image, price, and availability of each menu item so I can make informed choices.

Story Points: 5

Add Items to Cart [CRITICAL]

As a customer, I can add desired menu items to my shopping cart so I can prepare my order.

Story Points: 3

Update Item Quantities in Cart [CRITICAL]

As a customer, I can update the quantity of items in my shopping cart so I can adjust my order before checkout.

Story Points: 3

Remove Items from Cart [CRITICAL]

As a customer, I can remove items from my shopping cart so I can correct my order.

Story Points: 3

Autonomous AI Product Manager - Project Report

Implement Password Encryption [HIGH]

As a developer, I need to ensure all user passwords are encrypted to protect user data.

Story Points: 3

Enforce HTTPS [CRITICAL]

As a developer, I need to enforce HTTPS for all platform communication to secure data transmission.

Story Points: 1

Mobile Responsive Design for Customer Interface [HIGH]

As a customer, I want a mobile-responsive design so I can order conveniently from any device.

Story Points: 8

Place Online Pickup Order [CRITICAL]

As a customer, I can place an online order for pickup so I can get my items without waiting in line.

Story Points: 5

Credit/Debit Card Payments [CRITICAL]

As a customer, I can pay for my order using credit/debit cards so I have multiple payment options.

Story Points: 8

UPI Payments [HIGH]

As a customer, I can pay for my order using UPI so I have diverse payment options.

Story Points: 8

Display Estimated Preparation Time [HIGH]

As a customer, I can view an estimated preparation time for my order so I know when to expect it.

Story Points: 3

Customer Order Status Tracking [CRITICAL]

As a customer, I can track the real-time status of my active order so I am informed of its progress.

Story Points: 5

Display Order Statuses (Received, Preparing, Ready, Completed) [CRITICAL]

As a customer, I can see my order's status as 'Order Received', 'Preparing', 'Ready for Pickup', or 'Completed' so I clearly understand its current state.

Story Points: 3

Secure Payment Processing Implementation [CRITICAL]

As a developer, I need to ensure secure payment processing is implemented to protect financial transactions.

Story Points: 5

Autonomous AI Product Manager - Project Report

Order Placement Email Confirmation [HIGH]

As a customer, I want to receive an email confirmation after placing an order so I have a record of my purchase.

Story Points: 5

Order Status Update Email Notifications [HIGH]

As a customer, I want to receive email notifications when my order status updates so I am kept informed.

Story Points: 5

Payment Confirmation Notifications [HIGH]

As a customer, I want to receive an email notification confirming my payment so I know my transaction was successful.

Story Points: 3

Staff View New Orders [HIGH]

As a store staff, I can view new incoming orders in a list so I can begin processing them.

Story Points: 5

Staff Update Order Status [HIGH]

As a store staff, I can update an order's status (e.g., from 'Order Received' to 'Preparing') so customers are informed.

Story Points: 5

Earn Loyalty Reward Points [HIGH]

As a customer, I can earn reward points for purchases so I am incentivized to make repeat orders.

Story Points: 8

View Reward Point Balance [HIGH]

As a customer, I can view my current reward point balance so I know how many points I have available.

Story Points: 3

Redeem Loyalty Points at Checkout [HIGH]

As a customer, I can redeem reward points during checkout, up to a maximum of 500 points per order, to receive discounts.

Story Points: 8

Password Reset Functionality [HIGH]

As a customer, I can request a password reset if I forget my login details so I can regain access to my account.

Story Points: 5

Prevent Order Cancellation After Preparation [MEDIUM]

As a store staff, I need the system to prevent order cancellation after preparation starts to avoid waste.

Story Points: 5

Autonomous AI Product Manager - Project Report

Search Menu Items [MEDIUM]

As a customer, I want to be able to search for specific menu items so I can quickly find what I'm looking for.

Story Points: 5

Filter Menu Items by Category [MEDIUM]

As a customer, I want to be able to filter menu items by category so I can refine my browsing experience.

Story Points: 3

View Payment History and Receipts [HIGH]

As a customer, I can view my past payment history and receipts so I have a record of my transactions.

Story Points: 5

Admin Dashboard Login [HIGH]

As a System Administrator, I can log in to an Admin Dashboard to manage the system.

Story Points: 3

View Daily Sales Reports [HIGH]

As a Store Manager, I can view daily sales reports on the Admin Dashboard to monitor business performance.

Story Points: 5

View Weekly Sales Reports [HIGH]

As a Store Manager, I can view weekly sales reports on the Admin Dashboard to track trends.

Story Points: 5

View Monthly Sales Reports [HIGH]

As a Store Manager, I can view monthly sales reports on the Admin Dashboard for long-term analysis.

Story Points: 5

View Top-Selling Products Report [HIGH]

As a Store Manager, I can view a report of top-selling products to understand popular items.

Story Points: 8

Manage Menu Items (CRUD) [HIGH]

As a Store Manager, I can add new menu items, edit existing ones, and remove items to keep the menu updated.

Story Points: 8

Edit Menu Prices [HIGH]

As a Store Manager, I can edit menu item prices to reflect cost changes or promotions.

Story Points: 3

Autonomous AI Product Manager - Project Report

Manage Customer Accounts [MEDIUM]

As a System Administrator, I can manage customer accounts (e.g., view details, suspend) for operational control.

Story Points: 8

Implement Role-Based Access Control (RBAC) [HIGH]

As a System Administrator, I can manage user permissions and roles (RBAC) to ensure appropriate access levels.

Story Points: 8

Restrict Staff Access to Financial Reports [HIGH]

As a Store Staff, I should not be able to access financial reports to maintain data security and role separation.

Story Points: 3

Social Login with Google [MEDIUM]

As a customer, I can register and log in using my Google account for convenience.

Story Points: 8

Customer Purchase Trends Report [MEDIUM]

As a Store Manager, I can view customer purchase trends to understand buying behavior.

Story Points: 8

Revenue Forecasting Dashboard [LOW]

As a Store Manager, I can access a revenue forecasting dashboard to aid in business planning.

Story Points: 13

Platform Scalability for Multiple Store Locations [MEDIUM]

As a developer, I need to ensure the platform is designed for future support of multiple store locations.

Story Points: 5

Horizontal Scaling Support [MEDIUM]

As a developer, I need to ensure the architecture supports horizontal scaling to handle high traffic loads.

Story Points: 5

Achieve 99.9% Uptime [HIGH]

As a product owner, I require the system to achieve a 99.9% uptime target to ensure high reliability.

Story Points: 8

Implement Daily Data Backups [HIGH]

As a developer, I need to implement daily data backups to prevent data loss.

Story Points: 5

Autonomous AI Product Manager - Project Report

WCAG Accessibility Compliance [MEDIUM]

As a customer, I want the website to comply with WCAG accessibility guidelines so it is usable by everyone.

Story Points: 13

Achieve Sub-2-Second Page Load Time [HIGH]

As a product owner, I want the page load time to be under 2 seconds to ensure a fast user experience.

Story Points: 5

Achieve Sub-1-Second Search Results [HIGH]

As a product owner, I want search results to appear within 1 second for quick navigation.

Story Points: 3

Support 10,000 Daily Users [HIGH]

As a product owner, I want the system to support 10,000 daily users without performance degradation.

Story Points: 8
