3. User Stories (Points & Jira Links)

Customer Registration [CRITICAL]

As a new customer, I want to register for an account using my email and a password, so I can place orders and track my history.

Story Points: 5

Customer Login/Logout [CRITICAL]

As a registered customer, I want to securely log in and log out of my account, so I can access my profile and order history.

Story Points: 3

Customer Password Reset [HIGH]

As a registered customer, I want to be able to reset my password if I forget it, so I can regain access to my account.

Story Points: 5

Social Login (Google) [MEDIUM]

As a customer, I want to be able to log in using my Google account, so I can have a convenient and quick sign-in option.

Story Points: 5

Display Menu Categories [HIGH]

As a customer, I want to see menu items organized by categories like Coffee, Tea, Snacks, and Desserts, so I can easily navigate the menu.

Story Points: 3

Display Menu Item Details [HIGH]

As a customer, I want to view details for each menu item including name, description, image, price, and availability, so I can make informed choices.

Story Points: 3

Search Menu Items [HIGH]

As a customer, I want to be able to search for specific menu items by keywords, so I can quickly find what I'm looking for.

Story Points: 5

Filter Menu by Category [HIGH]

As a customer, I want to filter menu items by category, so I can browse specific types of products.

Story Points: 3

Establish Scalable Architecture Foundation [HIGH]

Autonomous AI Product Manager - Project Report

As a System Administrator, I want the underlying architecture to support future growth and multiple store locations, so the system can scale effectively.

Story Points: 8

Implement Core Security Measures (Initial) [CRITICAL]

As a System Administrator, I want initial security measures like password encryption and HTTPS to be in place, so customer data is protected from the start.

Story Points: 8

Add Item to Cart [CRITICAL]

As a customer, I want to add desired menu items to a shopping cart, so I can compile my order before checkout.

Story Points: 3

Update Cart Item Quantity [CRITICAL]

As a customer, I want to be able to easily update the quantity of items in my cart, so I can adjust my order as needed.

Story Points: 3

Remove Item from Cart [CRITICAL]

As a customer, I want to remove items from my cart, so I can correct mistakes or change my mind before placing an order.

Story Points: 3

Place Online Order [CRITICAL]

As a customer, I want to be able to place an order online through the platform, so I can avoid waiting in line.

Story Points: 5

Select Pickup Option [HIGH]

As a customer, I want to specify that my order is for pickup at the store, so the staff knows how to fulfill it.

Story Points: 3

Pay with Credit/Debit Card [CRITICAL]

As a customer, I want to securely pay for my order using a credit or debit card, so I can complete my purchase online.

Story Points: 8

Pay with UPI [HIGH]

As a customer, I want to pay for my order using UPI, so I have diverse payment options.

Story Points: 8

Generate Payment Receipt [HIGH]

As a customer, I want to receive a digital payment receipt after my purchase, so I have proof of transaction.

Autonomous AI Product Manager - Project Report

Story Points: 5

Email Payment Confirmation [HIGH]

As a customer, I want to receive an email confirmation after successful payment, so I have a record of my transaction.

Story Points: 5

View Payment History (Customer) [MEDIUM]

As a customer, I want to view my past payment history, so I can keep track of my spending.

Story Points: 5

Display Estimated Preparation Time [HIGH]

As a customer, I want to see an estimated preparation time for my order, so I know when it will be ready.

Story Points: 5

Track Order Status (Customer) [HIGH]

As a customer, I want to track the real-time status of my order, so I know its current stage of preparation and when to pick it up.

Story Points: 5

Update Order Status (Staff) [CRITICAL]

As a Store Staff member, I want to update the status of an order (e.g., 'Preparing', 'Ready for Pickup') as it progresses, so customers receive accurate real-time updates.

Story Points: 5

Email Order Confirmation [HIGH]

As a customer, I want to receive an email confirmation immediately after placing an order, so I have a record of my purchase.

Story Points: 5

Email Order Status Updates [HIGH]

As a customer, I want to receive email notifications when my order status changes (e.g., 'Ready for Pickup'), so I stay informed.

Story Points: 5

View Daily Order Summary (Staff/Manager) [HIGH]

As a Store Staff or Manager, I want to view a summary of daily orders, so I can efficiently manage the workload and track incoming requests.

Story Points: 5

Earn Loyalty Points on Purchase [HIGH]

Autonomous AI Product Manager - Project Report

As a customer, I want to automatically earn reward points for every purchase I make, so I can benefit from my loyalty.

Story Points: 5

Redeem Loyalty Points at Checkout [HIGH]

As a customer, I want to be able to redeem my accumulated reward points during checkout, with a maximum of 500 points per order, so I can get discounts on my purchases.

Story Points: 8

View Loyalty Point Balance [HIGH]

As a customer, I want to view my current reward point balance, so I know how many points I have available.

Story Points: 3

View Revenue Reports (Manager) [HIGH]

As a Store Manager, I want to view revenue reports, so I can understand the financial performance of the store.

Story Points: 8

View Top-Selling Products Report (Manager) [MEDIUM]

As a Store Manager, I want to view a report on top-selling products, so I can make informed decisions about inventory and promotions.

Story Points: 5

Generate Daily Sales Report (Manager) [HIGH]

As a Store Manager, I want to generate daily sales reports, so I can monitor day-to-day performance.

Story Points: 8

Generate Weekly Sales Report (Manager) [MEDIUM]

As a Store Manager, I want to generate weekly sales reports, so I can analyze trends over a longer period.

Story Points: 5

Generate Monthly Sales Report (Manager) [MEDIUM]

As a Store Manager, I want to generate monthly sales reports, so I can assess overall monthly performance.

Story Points: 5

View Customer Purchase Trends (Manager) [MEDIUM]

As a Store Manager, I want to view reports on customer purchase trends, so I can better understand customer behavior and tailor offerings.

Story Points: 8

Manage Menu Items (Manager) [HIGH]

As a Store Manager, I want to be able to add, edit (including prices), and remove menu items, so I can keep the online

Autonomous AI Product Manager - Project Report

menu accurate and up-to-date.

Story Points: 8

Manage Customer Accounts (Admin) [MEDIUM]

As a System Administrator, I want to manage customer accounts, so I can handle support requests or issues related to user access.

Story Points: 8

Implement Performance Optimizations [HIGH]

As a System Administrator, I want the system to meet performance targets (e.g., page load <2s, search <1s, support 10,000 daily users), so users have a fast and responsive experience.

Story Points: 8

Ensure Mobile Responsiveness [HIGH]

As a customer, I want the website to be fully responsive and optimized for mobile devices, so I can easily order on my phone or tablet.

Story Points: 8

Implement Role-Based Access Control [HIGH]

As a System Administrator, I want role-based access control to be fully implemented, so each user type (customer, staff, manager, admin) has appropriate permissions.

Story Points: 8

Configure Uptime Monitoring & Backups [HIGH]

As a System Administrator, I want robust uptime monitoring and daily backups configured, so the system achieves 99.9% uptime and data is protected.

Story Points: 5

Access Revenue Forecasting Dashboard (Manager) [LOW]

As a Store Manager, I want access to a revenue forecasting dashboard, so I can plan future strategies and operations.

Story Points: 13
